PRICE:
€ 20,80 (VAX excl.)

SKU:
P400480700061

#ATHENARESTARTSVESPA

This new gasket kit was developed for all Vespa enthusiasts who want to rebuild the engine of their bikes with **safe and cutting-edge products**.

With over 40 years of experience in the production of gaskets for high-performance racing engines, Athena has engineered this unique gasket kit, specific for **Vespa Smallframe 50, 90, 125**, which ensures several advantages:

MAIN FEATURES

BYE BYE SILICONE

Unlike classic asbestos-free gaskets on the market, **this Athena gasket kit do not require extra sealants to guarantee a perfect seal.**

Simply remove the old gaskets and install the new Athena kit: you will not have to clean silicone residues from the crankcase anymore nor wait hours after applying a sealant.

UNIQUE ON THE MARKET

The aluminum core of the gasket ensures **excellent resistance to engine pressure and thermal expansion**, while the external rubber coating **adheres perfectly to the engine surfaces**, and it seals common porosity or defects of overhauled engines.

Classic asbestos-free gaskets can not boast these sealing and resistance characteristics.

+40 UNIFIED GASKET KIT:> 40 APPLICATIONS

The composition of this kit unifies the most popular and beloved Vespa Smallframe applications, such as 50 Special, 90, 125 Primavera and ET3.

Choose the gaskets that best suits your needs, and carefully use a cutter to remove any extra parts of the crankcase gasket.

Discover the complete list of applications on athena.eu.

INCLUDED IN THE P400480700061 GASKET KIT

SKU	OEM REF.	QTY	DESCRIPTION
M704008012510	000397	2	OIL DRAIN BOLT PLUG GASKET D. 12,5mm, d. 8,2xmm, th. 1mm
